

MI COMMUNITY CARE

COORDINATED CARE TO MEET YOUR HEALTH AND PERSONAL GOALS.
BROUGHT TO YOU BY THE LIVINGSTON-WASHTENAW SIM.

What is it?

MI Community Care is a free program run by local service organizations that work with you and each other to meet your health and personal goals.

Participants receive a broad range of services from peers, community health workers, and care coordinators at more than a dozen local organizations across Washtenaw and Livingston Counties.

To date, more than 450 residents have benefitted from this confidential program, which does not interfere with other forms of aid.

How does it work?

MI Community Care participants are given a care coordinator from one of several local organizations.

Care coordinators meet with participants to learn about their health and personal goals, then help participants achieve those goals by working closely with a range of health, behavioral health, and social service organizations in the area.

Health and personal goals?

What kinds of goals have care coordinators helped participants achieve?

- Securing health insurance
- Getting prescriptions and necessary medical equipment
- Searching for safe, stable, and affordable housing
- Accessing food, including pantry items and home-delivered meals
- Funding utilities, including electricity, heat, and water
- Managing medications and interpreting doctor's recommendations
- Applying for benefits, including unemployment, social security, disability, and more
- Scheduling appointments for health, mental health, and social service needs
- Supporting caregivers
- Accessing substance use treatment and supportive services
- Getting transportation to appointments
- Finding help with medical bills, other bills, or debt
- Acquiring furniture and modifying homes for wheelchair access

What do I need to do?

- Answer some questions so your care coordinator can understand your health and life goals, then work with your care coordinator to establish a detailed plan
- Sign a consent document so your care coordinator can talk to care coordinators at other agencies (you can decide which agencies) to help you meet your goals
- Meet with and talk to your care coordinator on a regular basis, perhaps also to community health workers, peer support specialists, and others, as needed
- Actively participate to achieve your health and life goals
